#### Career Profile

I'm a student at the University of Waterloo, with a passion for computer science, especially security. I'm always looking for cool new opportunities, especially in co-op!

#### Work Experience

Software Tester and Documentation Specialist

July - August 2020

Centre for Community Mapping

I worked as a tester for the research company, testing their systems and working on their automated testing system.

I also worked to write some documentation for their systems.

Developer

October - January 2020

Centre for Community Mapping

I spent my high-school co-op at the not-for-profit company, developing a Microsoft Excel and Google Sheets frontend for uploading data.

#### Selected Projects

**Supermoms Club Website Competition** 

June 2020

My friend and I competed in a competition to create a website for a startup company.

We ended up winning the competition, winning me and my friend 125\$ each.

We ended up creating a fully-functional website in both english and simplified chinese. The website featured a payment system using Stripe, along with a full shopping system.

The website source can be seen on my github under supermoms.

#### **James Robertson Memorial Programming Competition**

February 2020

The James Robertson Memorial Programming Competition was a programming comeptition in Smalltalk.

The competition was conducted in 5 rounds, where each team submitted Als for a game they developed.

My team won the competition, winning us 1500\$ each.

### Education

**Honours Mathematics** 

September 2020 - Present

University of Waterloo

**High School** 

September 2016 - June 2020

Waterloo Collegiate Institute
